**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The metes and bounds of the limitation "nascent form" are indefinite.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. **Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hagenmaier US 5276250**  
**As set forth in the previous office action.**

***Response to Arguments***

6. Applicant's arguments filed 3/15/09 have been fully considered but they are not persuasive. Applicant argues that Hagenmaier does not teach the use of a hydrogen donor, carbon, and at least one additional reducing substance. In response, Hagenmaier teaches decomposition of polyhalogenated compounds by contacting them with at least one of the group consisting of Ca, Ba, Zn, Ni, Ti, Cu, Fe, Al, Pd, Pt, V, W, Mo, Rh, or Cr or an oxide silicate or aluminate thereof. See Column 2 Line 60-61. At least one of these could be considered an additional reducing substance. The combination of these metals with Cu can be in at least the oxide, carbonate, or salt composition. See Column 6 Line 28. Therefore, at least one of these metals disclosed would constitute an additional reducing substance required by the claims. Further, even if those metal compounds could not be considered an additional reducing substance, the fly ash stream would contain at least a portion of carbon monoxide from non-fully combusted carbon, which could also be considered an additional reducing substance. With respect to the hydrogen donor, Hagenmaier teaches that the process may be performed in the presence of water. See Column 4 Line 2. With respect to carbon, the fly ash stream would contain at least some carbon, or in the alternative, it would at least be obvious to use carbon in the process to absorb halogenated byproducts of the process, as in Example 12, where Hagenmaier requires the stream be passed over highly reactive cartridges of carbon. See Column 13 Lines 1-3.
7. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies

(i.e., the oxidation state or the ox-redox potency) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### ***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
